

Scala Content Accelerator

WITHOUT CONTENT ACCELERATION

WITH CONTENT ACCELERATION

DON'T KEEP YOUR AUDIENCE WAITING

Scala Content Accelerator is a cache server solution that optimizes digital signage experiences by guaranteeing reliable, timely delivery of content to your digital signage players. By keeping your digital signage library accessible on your local LAN, you can deliver dynamically changing rich-media content to any screen without having to worry about network bandwidth issues and content delays.

- ▶ Deliver media-rich experiences with no delay or buffering
- ▶ Expand in-store digital signage without worrying about network congestion
- ▶ Improve the customer experience with accelerated response times
- ▶ Small footprint fits seamlessly into your local network
- ▶ Save money instead of continually purchasing extra bandwidth
